Objective

Computer Science and Engineering graduate with strong knowledge of Core Java, JDBC, Servlets, Hibernate, SQL, HTML, CSS, JavaScript. Skilled in developing responsive web applications, database integration, and object-oriented programming concepts. Familiar with building dynamic applications using Java technologies and front-end web technologies. Seeking an opportunity to apply my technical skills, enhance my knowledge and contribute effectively to organizational growth.

Core Skills

- **Java:** Strong understanding of OOP concepts (Encapsulation, Inheritance, Polymorphism, and Abstraction), Exception Handling, Collection Framework (Collection and Map), and Multithreading concepts including thread lifecycle and synchronization.
 - **SQL:** Strong understanding of CRUD operations, Joins, Subqueries, Grouping, Functions; hands-on experience with MS SQL and Oracle SQL; knowledge of DQL, DDL, DML, TCL, and DCL commands; Database Normalization.
 - **Web Development:** Strong knowledge of HTML (semantic and non-semantic tags), CSS (selectors, positioning, display, and box model), and JavaScript (variables, functions, arrays, objects, DOM, and BOM); experienced in building responsive static and dynamic websites.
 - **ReactJS:** Experienced in building dynamic and responsive user interfaces using ReactJS, including component-based architecture, JSX, props and state management, React Hooks, routing, API integration, event handling, form validation, and developing single-page applications (SPA).
-

Internships

AI - Data Quality Analyst Intern

Sept 2024 – Feb 2025

Rooman Technologies Pvt. Ltd. (Remote)

- Reviewed and validated large AI datasets to ensure data accuracy, consistency, and labeling quality across multiple formats (text, image, etc.).
 - Built Power BI dashboards to track data quality metrics, highlight anomalies, and support insights for continuous improvement.
 - Utilized Python, SQL, and data annotation tools to automate quality checks and streamline the data curation process.
-

Project Lead Developer (Dynamic ETL)

Nov 2023-Dec 2023

Prodevans Pvt Limited, Hyderabad (Remote)

- Worked on the ETL (Extract, Transform, Load) process to integrate data from multiple sources, standardize it into a uniform format, and load it into a centralized database or data warehouse for further analysis and reporting.
 - Focused on optimizing data transformation logic and ensuring data quality, consistency, and integrity throughout the pipeline.
 - Technologies Used: SQL, Python, Pandas, Data Warehousing Tools
-

Projects

Static web pages – Facebook Validation, Shadi.com, Knitebite.com.

Dynamic web pages – Digital clock, Calculator, Age Calculation.

E-Commerce Web Application

- Built a responsive e-commerce web application using **React JS, JavaScript, HTML, and CSS**.
 - Developed an E-Commerce web application using API fetching to display dynamic product data.
 - Implemented category-based product filtering for easy navigation.
 - Added Add to Cart functionality with options to add or remove products.
 - Used routing to enable smooth navigation between different pages of the application.
-

College Data Management System

- Designed and implemented a relational database to manage student records, faculty details, courses, and exam schedules with emphasis on data integrity and security.
 - Wrote complex SQL queries for efficient data retrieval, updates, and reporting to support administrative tasks.
 - Technologies Used: MySQL, HTML/CSS, JS.
-

Education

Bachelor of Engineering in Computer Science and Engineering Poojya Doddappa Appa College of Engineering, Gulbarga, Karnataka	2022-2025
Karnataka Board Pre-University Examination KLE’s Independent PU College, Karnataka	2021
SSLC– Karnataka State Board Pragati high school, Karnataka	2019
