

SARANKUMAR E

sksaran987@gmail.com | 8248286612 | Bengaluru, Karnataka 560102

Summary

Dynamic software developer with experience at RD INFRO Technology, specializing in Java and REST APIs. Proven track record in enhancing application performance and developing machine learning workflows. Adept at leveraging text-to-speech technology and collaborating effectively within teams to drive innovative solutions. Committed to delivering high-quality results in fast-paced environments.

Skills

- Machine learning
- Natural Language Processing
- Speech Synthesis
- Audio Processing
- REST APIs
- Java
- Spring Boot
- SQL
- Git & GitHub
- Docker
- Postman
- SDLC
- STLC
- CI/CD
- Debugging
- JavaScript
- Schema Design

Experience

Terra Tern | Bengaluru, India

Operations Analyst

03/2026 – Current

- **Core Role:** Operations Executive at TerraTern (Bangalore) focused on process optimization, data handling, and cross-functional communication.
- **System Management:** Actively operating and managing the company's CRM platforms and Email Automation Tools to streamline daily workflows.
- **Project Development:** Leading the frontend build for the "Terra Tern AI Audio Studio" to create a dynamic, visually immersive UI with animated elements.
- **Administrative Operations:** Ensuring workflow accuracy and alignment through consistent use of the internal CRM app.
- **Internal Development:** Participating in company-wide growth initiatives, including completing mandatory quarterly German language assessments.

RD INFRO Technology | Chennai, India

Software Developer Intern

01/2025 – 03/2025

- Designed RESTful APIs, integrated MySQL databases using Hibernate/JPA, and optimized queries.
- Developed scalable Java Spring Boot backend modules to support application growth.
- Improved application performance by nearly 30% through caching and query optimization.
- Diagnosed and resolved 15+ production-level issues, enhancing overall system reliability.

Bluestock Info Technology | Remote

ML Engineering Intern

12/2024 – 01/2025

- Created REST-integrated Python pipeline to manage and analyze datasets exceeding 5,000 records, streamlining data processing.
- Developed machine learning evaluation workflows for real-world datasets, enhancing model testing and performance analysis.
- Automated backend integration to enhance model evaluation efficiency.

Education

K.S. Rangasamy College of Technology | Tamil Nadu, India

Bachelor of Technology (B.Tech) in Artificial Intelligence & Data Science

01/2025

Certifications

- Microsoft Azure Fundamentals (AZ-900), Microsoft
- Microsoft Azure AI Fundamentals (AI-900), Microsoft
- Salesforce Developer Certification, Salesforce

Projects

- **Food Delivery Web Application:** Java, Spring Boot, REST API, MySQL, JavaScript. Developed a full-stack food delivery application with a Java Spring Boot backend to manage users, restaurants, menus, and orders through RESTful APIs. Designed normalized MySQL database schemas, implemented CRUD operations, input validation, exception handling, and secure API communication for seamless data processing. Improved application reliability by reducing page load time by approximately 35% through optimized backend logic, SQL query optimization, and efficient API integration.
- **Driver Drowsiness Detection System:** Python, OpenCV, Keras. Developed a real-time driver drowsiness detection system using deep learning techniques to improve road safety through continuous monitoring. Implemented CNN models with Python, OpenCV, and Keras for live eye-state detection, image preprocessing, and automated alert generation. Achieved approximately 92% detection accuracy with alert response time below 1.5 seconds, ensuring reliable real-time performance.
- **Core Objective Text - To - Audio:** Transformed written text into natural-sounding speech using advanced Text-to-Speech (TTS) technology to improve user engagement. *Technical Approach:* Leveraged machine learning models and APIs to process text syntax and apply appropriate intonation, generating high-quality audio files for diverse applications. *Key Applications:* Enhanced digital accessibility and automated voiceover creation for multimedia, enabling hands-free content consumption for users with varying needs.
