PROFESSIONAL SUMMARY

Detail-oriented and analytical **Data Analyst** with hands-on experience in SQL, Python, machine learning, and database management. Proven track record in data manipulation, optimizing pipeline queries, and processing large datasets exceeding 5,000+ records to generate actionable insights. Skilled in quantitative analysis, database schema design, and leveraging data tools to streamline operational workflows and decision-making processes.

SKILLS & COMPETENCIES

Data & Analytics:	Data Analysis, Data Modeling, Quantitative Analysis, Database Tools, Schema Design, Audio Processing
Technical & Tools:	Excel, SQL, MySQL, Python, Machine Learning, Tableau/PowerBI, REST APIs, Alteryx
Development & DevOps:	Java, Spring Boot, Postman, Docker, Git & GitHub, CI/CD, SDLC, STLC, Debugging

WORK EXPERIENCE

Terra Tern — Operations Analyst

Bengaluru, India | 03/2026 – Present

- Focused on data handling, quantitative analysis, process optimization, and cross-functional reporting across operations.
- Actively operate and manage CRM platforms and Email Automation Tools to analyze, audit, and streamline daily operational workflows.
- Analyze operational data to identify bottlenecks, ensuring workflow accuracy and alignment using key CRM metrics.
- Leading the frontend build for "Terra Tern AI Audio Studio" to create a dynamic, visually immersive UI with animated elements.

RD INFRO Technology — Software Developer Intern

Chennai, India | 01/2025 – 03/2025

- Integrated MySQL databases using Hibernate/JPA and designed optimized SQL queries for complex database operations.
- Executed query optimization, caching strategies, and backend logic tuning, improving application performance by nearly 30%.
- Diagnosed and resolved 15+ production-level issues through deep data debugging, enhancing overall system reliability.
- Developed scalable Java Spring Boot backend modules to support growing enterprise application requirements.

Bluestock Info Technology — ML Engineering Intern

Remote | 12/2024 – 01/2025

- Created REST-integrated Python data pipelines to cleanse, aggregate, and analyze datasets exceeding 5,000 records.
- Performed quantitative analysis and developed machine learning evaluation workflows for real-world datasets.
- Automated backend integration and model evaluation workflows to increase data processing efficiency.

PROJECTS

Food Delivery Web Application (Java, Spring Boot, REST API, MySQL, JavaScript)

- Designed normalized MySQL database schemas, implemented CRUD operations, input validation, and secure API communication.
- Leveraged SQL optimizations and backend caching to reduce page load times by ~35% and improve system efficiency.

Driver Drowsiness Detection System (Python, OpenCV, Keras, CNN)

- Processed real-time visual and numerical datasets using deep learning techniques to monitor driver eye-states.
- Achieved ~92% detection accuracy with alert response latency under 1.5 seconds for continuous road safety monitoring.

Text - To - Audio Core Objective (Machine Learning, TTS APIs)

- Transformed written text into natural-sounding speech using advanced machine learning models and Text-to-Speech APIs.
- Processed complex syntax and intonation parameters to enhance digital accessibility and automated voiceover workflows.

EDUCATION

K.S. Rangasamy College of Technology — B.Tech in Artificial Intelligence & Data Science

Tamil Nadu, India | 01/2025

CERTIFICATIONS

- Microsoft Azure Fundamentals (AZ-900), Microsoft
- Microsoft Azure AI Fundamentals (AI-900), Microsoft
- Salesforce Developer Certification, Salesforce

LANGUAGES

- English (Upper Intermediate - B2)
- Tamil (Advanced - C1)
